

INFORMATION SECURITY POLICY

KEPHIS is a regulatory body mandated to assure plant health, quality of agricultural inputs and produce towards a food secure nation and safe trade.

The Board of Directors, Management and Staff are committed to implementation of information security through preservation of confidentiality, integrity and availability of information assets against threats by ensuring that:

- Information processed, stored, monitored, traded or released is of absolute integrity;
- Information shall be monitored and stored in a manner that maintains confidentiality;
- Data and information shall be available to interested parties where and when required.

In pursuit of the above commitment, KEPHIS shall:

- Continually improve the suitability adequacy and effectiveness of the ISMS;
- Comply with legal regulatory and contractual requirements in the management of ISMS; and
- Establish and implement a risk management framework documented in accordance with the requirements of ISO/IEC 27001:2022.

This information security policy shall be communicated, understood, applied within the organization and availed to interested parties.

PROF. THEOPHILUS M. MUTUI, PHD

MANAGING DIRECTOR
